IDENTIFICATION

REFERENCE WEEK
We want information about a normal recent week. Avoid exam week, school closure week, illness week, festival week, funeral week, heavy rain disruption, or other unusual periods if possible.
In the last week, was your routine normal, or was there something unusual?
What made it unusual?
Other. Specify

If the last week was very unusual, ask about the most recent normal week. Was there a recent normal week you can describe?

REFERENCE WEEK

CONSENT, IDENTIFICATION, AND REFERENCE WEEK

WEEKLY NON-SCHOOL TIME ALLOCATION USING PEBBLES

This module measures the full weekly allocation of non-school time. It allows us to construct: total weekly chore time; total weekly study time; total weekly rest time; total weekly personal care time; share of non-school time spent on chores; whether study on weekends compensates for lack of study after late school days; whether treatment changed total chore burden or mainly changed timing.

Enumerator: Reads and explains. Definition of categories. I am going to ask you about how you usually spend your time when you are awake and not in school. For each day, we will use 10 pebbles. The 10 pebbles represent all the time you are awake and not at school on that day. You will put the pebbles into four groups.
1. Household chores: cooking, cleaning, sweeping, washing dishes, laundry, fetching water, caring for siblings, going to the market, helping with family business, farm work, errands for the household.
2. Study / homework / lesson review: homework, reading notebooks, reviewing lessons, preparing for tests, school exercises, studying with someone.
3. Rest/leisure: sitting quietly, lying down, recovering from tiredness, doing nothing, short naps, relaxing without doing chores or studying. This also includes playing with friends/siblings.
4. Personal care: eating, bathing, dressing, preparing school items, prayer, preparing for bed.

SCHOOL-WEEK SCHEDULE AND EVENING TIME WINDOW (MONDAY-FRIDAY)

Now I would like to ask about your usual routine from Monday to Friday during a normal school week.

What is the main way you usually travel between home and school?

Other. Specify

On a normal school day, about how long does it usually take from the moment you leave home until you arrive at school?

Now think about a normal school week from Monday to Friday. For each day, I will ask about when school ended and when you went to bed.

SCHOOL EVENING SCHEDULE

${sch_week_evening_day_name}

What time did classes end?

Using the travel time you told me earlier, you arrived home around ${display_home_arrival_hour}:${display_home_arrival_minute_txt}, correct?

Please enter the correct time

What time did you go to bed that night?

Was this usually a normal school day for you?

SCHOOL EVENING SCHEDULE

SCHOOL-WEEK SCHEDULE AND EVENING TIME WINDOW (MONDAY-FRIDAY)

WEEKEND WAKING-DAY SCHEDULE (SATURDAY-SUNDAY)

Now let's think about Saturday and Sunday, when you usually do not have school.

WEEKEND SCHEDULE

${sch_weekend_day_name}

What time did you wake up?

What time did you go to bed?

Was this usually a normal school day for you?

WEEKEND SCHEDULE

WEEKEND WAKING-DAY SCHEDULE (SATURDAY-SUNDAY)

PEBBLE ALLOCATION EXERCISE
Now we are going to use 10 pebbles to show how your time was spent on each day. The pebbles represent the time when you were awake and not in class. - For Monday-Friday: the relevant time window is from arriving home after school until bedtime. - For Saturday-Sunday: the relevant time window is from waking up until bedtime. The distinction is extremely important and should be emphasized clearly. The four boxes should be clearly labeled with pictures/icons as presented earlier.
PEBBLE ALLOCATION - MONDAY TO FRIDAY
Think about the time between when you arrived home from school and when you went to bed on ${mon_fri_pebble_roaster_label}. These 10 pebbles represent that time. Please place the pebbles across the four boxes to show how your time was divided.
What time did you spend on chores?
Was there any time at all spent on the other activities?
What time did you spend on study?
Was there any time at all spent on the other activities?
What time did you spend on rest or leisure activities?
Was there any time at all spent on the other activities?
What time did you spend on personal care activities?
Was there any time at all spent on the other activities?
Eating, bathing, dressing, and preparing for bed count as personal care.
PEBBLE ALLOCATION - MONDAY TO FRIDAY

Even a short time sitting, relaxing, talking with friends, or recovering from tiredness counts as rest/leisure. Please double-check the days recorded with 0 pebbles for rest, since more than 1 day in the week was recorded this way.
PEBBLE ALLOCATION - SATURDAY/SUNDAY
Now think about the whole day on ${sat_sun_pebble_roaster_label}, from when you woke up until when you went to bed.
How much time did you spend on chores, from when you woke up until when you went to bed?
Was there any time at all spent on the other activities?
How much time did you spend on study, from when you woke up until when you went to bed?
Was there any time at all spent on the other activities?
How much time did you spend on rest/leisure, from when you woke up until when you went to bed?
How much time did you spend on personal care, from when you woke up until when you went to bed?
Was there any time at all spent on the other activities?
PEBBLE ALLOCATION - SATURDAY/SUNDAY

PEBBLE ALLOCATION EXERCISE

WEEKLY NON-SCHOOL TIME ALLOCATION USING PEBBLES

TIMING OF CHORES DURING THE CRITICAL LATE-SCHOOL EVENING
This module measures whether chores occur during the most costly window: after a long school day and before another school day. The module should be asked for one selected reference day: the most recent normal school day when the respondent had afternoon classes, finished school late, and had class again the next morning.
IDENTIFY CRITICAL REFERENCE DAY
During the reference week, did you have any day when you had afternoon classes, finished school late, and had class again the next morning?
Which day was the most recent normal day like that?
What time did school end on that day?

What time did you go to bed that night?
What time did school start the next morning?
IDENTIFY CRITICAL REFERENCE DAY

HOUR-BY-HOUR CHORE TIMING
Enumerator instruction: Use arrival home time and bedtime to create time blocks. The preferred blocks are one-hour intervals. If arrival is not exactly on the hour, round down to the nearest half-hour or hour according to survey programming rules.
How many time blocks?
What are the time blocks?
TIME BLOCK
Now think about ${time_block_label}. For each block, please tell me whether you studied, did some chores, rested, or did some personal care.
During this time, do you do household chores?
What chore did you do?
Other. Specify
During this time, do you study?
How well were you able to concentrate while studying that ${time_block_label}?
How tired were you when you studied that evening?
What was the main reason you did not study that ${time_block_label}?
Other. Specify
During this time do you do rest/leisure activities?
During this time do you do personal care activities?
TIME BLOCK

HOUR-BY-HOUR CHORE TIMING

TIMING OF CHORES DURING THE CRITICAL LATE-SCHOOL EVENING

QUALITY OF REST
The intervention may not only change total study minutes. It may also change the quality of study time. A girl who studies after several hours of chores may have lower-quality study time than a girl who studies after rest. This module should be asked about the same critical late-school evening selected in the previous module.
When you get home from school in the evening, do you usually rest before doing any schoolwork/study?
QUALITY OF REST

CHORE ALLOCATION
This module measures whether the intervention changed household routines.
CURRENT CHORE RESPONSIBILITIES
CHORE RESPONSIBILITIES
Do you do ${chore_item_label}?
How many days a week?
CHORE RESPONSIBILITIES

CURRENT CHORE RESPONSIBILITIES

Of these chores, which one takes the most time?
Other. Specify
Which chore is most likely to prevent you from studying?
Other. Specify
Which chore is most likely to make you tired?
Other. Specify

CHORE ALLOCATION

PERCEIVED TRADEOFFS BETWEEN CHORES, STUDY, AND REST
This module measures whether the girl herself perceives the conflict between chores and education.
In a normal week, do household chores prevent you from studying as much as you would like?
In a normal week, do household chores make you too tired to study well?
In a normal week, do household chores make you go to bed later than you would like?
Do you feel that your parents or guardians protect time for you to study?
PERCEIVED TRADEOFFS BETWEEN CHORES, STUDY, AND REST

ASPIRATIONS, GENDERED EXPECTATION AND AGENCY
ASPIRATIONS
What is the highest level of education you would like to complete?
What is the highest level of education you think you will actually complete?
What job would you like to have when you are an adult?
How likely do you think it is that you will reach that job?
ASPIRATIONS

WHAT USUALLY HAPPENS WHEN CHORES AND SCHOOLWORK CONFLICT?
This section measures whether girls face, accept, or internalize gendered expectations around chores and schooling. The goal is not to ask whether chores are good or bad. The goal is to understand what happens when chores, study, rest, and family expectations conflict. Enumerator introduction: Now I will ask about what usually happens at home when schoolwork and household tasks both need to be done. There are no right or wrong answers. We only want to understand your experience.
On a normal school evening, when you have both homework/studying and household chores to do, what are you usually expected to do first?
If you start studying before finishing your chores, what is most likely to happen?
In the past month, did anyone ask you to stop studying or doing homework in order to help with household chores?
WHAT USUALLY HAPPENS WHEN CHORES AND SCHOOLWORK CONFLICT?

EXPECTATIONS FOR GIRLS AND BOYS
Enumerator introduction: Now I will ask about what you think adults in your household expect from you. There are no right or wrong answers.
In the past 7 days, did anyone ask you not to do a chore that you usually do and instead to go and study?
Parents' expectation about household skills: How important is it to adults in your household that you know how to do household chores well?
Parents' expectation about education: How important is it to adults in your household that you do well in school?
If you were a boy, do you think adults in your household would have different expectations about whether you should know how to do household chores well?
If you were a boy, do you think adults in your household would have different expectations about whether you should do well in school?
EXPECTATIONS FOR GIRLS AND BOYS

AGENCY AND VOICE AROUND TIME USE
This section measures whether the girl can express her needs, negotiate time, and be listened to. The focus is not abstract empowerment. The focus is whether she has voice in practical household decisions. Enumerator introduction: Now I will ask about whether you can talk to adults at home when you need time for schoolwork or rest.
ABILITY TO ASK FOR STUDY TIME AND REST
When you have schoolwork to do, how often can you ask for time to study before doing chores?
When you ask for time to study, how often do adults in your household listen to you?
When you are very tired after school, how often can you tell an adult that you need to rest?
When you say you are too tired and need rest, how often do adults in your household accept it?
ABILITY TO ASK FOR STUDY TIME AND REST

AGENCY AND VOICE AROUND TIME USE

ASPIRATIONS, GENDERED EXPECTATION AND AGENCY

GIRLS' GENDER ATTITUDES ABOUT CHORES AND SCHOOL
Enumerator introduction: Now I will ask a few questions about how chores and school should be organized for boys and girls. These are imaginary situations. There are no right or wrong answers. We want to understand what you think.

Imagine that in the future you are responsible for a household with a daughter and a son who are around the same age. How would you want household chores to be shared between them?
Imagine that your daughter has homework to finish, but your son is free. The household also needs help with chores. What should happen first?
Imagine that your daughter and your son both have homework, and the household also needs help with chores. What should happen?
Which statement is closest to what you think? (Completing BEPC)
Which statement is closest to what you think? (Completing BAC)
Which statement is closest to what you think? (Completing University)
Which statement is closest to what you think? (School performance)
